PERSONAL DETAILS

Date of Birth: 18 April 1996

Gender: Female

Nationality: Kenyan

Address: 12 Kirimani Road, Kilimani, Nairobi 00100, Kenya

PROFILE

Full-stack engineer with 7 years building logistics and e-commerce platforms for East African markets. I own services end to end, from schema design through to on-call. Since 2023 I have been studying Japanese seriously and passed JLPT N2 in July 2025. I am looking for a remote-first role with a Japanese company and am open to relocating to Tokyo within twelve months.

WORK EXPERIENCE

Lead Software Engineer - Sendy Logistics, Nairobi, Kenya

February 2023 - Present

- Lead a team of 5 on the dispatch platform that routes about 40,000 deliveries a day across Kenya, Uganda and Tanzania
- Rewrote the route-assignment service in Go, cutting median assignment time from 4.2 seconds to 900 milliseconds
- Introduced trunk-based development and a staging pipeline; releases went from fortnightly to daily
- Ran the migration of 6 years of trip history from MySQL to PostgreSQL with zero downtime
- Stack: Go, TypeScript, React, PostgreSQL, Redis, Kafka, Docker, Kubernetes, GCP

Senior Software Engineer - Twiga Foods, Nairobi, Kenya

March 2020 - August 2022

- Built the vendor-facing ordering portal used by 12,000 informal retailers
- Cut checkout abandonment from 41% to 23% by rebuilding the cart flow and adding offline-first support for intermittent connections
- Designed the pricing service that reconciles daily produce prices across 9 depots
- Mentored 3 junior engineers, two of whom were promoted within the year
- Stack: Python, Django, ReactJS, PostgreSQL, Celery, RabbitMQ, AWS

Software Engineer - Andela (remote, contracted to a Berlin fintech)

June 2018 - February 2020

- Remote contract with a German client, working a permanent 2-hour offset
- Built and maintained payment reconciliation APIs in Node.js and Express
- Wrote the internal tooling that flagged mismatched settlements before they aged
- First experience of fully asynchronous, written-first engineering culture
- Stack: Node.js, Express, MongoDB, React.js, Docker

EDUCATION

BSc Computer Science, First Class Honours

University of Nairobi, Kenya - 2014 to 2018

Japanese Language Programme (part-time, evenings)

Nairobi Japanese Language School - 2023 to present

LANGUAGES

English - Native

Swahili - Native

Igbo - Conversational

Japanese - JLPT N2, passed July 2025. Comfortable in daily standups, still slow in long written specs.

German - Basic (A2), picked up during the Berlin contract

SKILLS

Go, Golang, TypeScript, JavaScript, Python, Django, React, ReactJS, React.js, Node.js, NodeJS, PostgreSQL, Postgres, MySQL, MongoDB, Redis, Kafka, RabbitMQ, Docker, Kubernetes, Terraform, GCP, AWS, REST APIs, gRPC, GraphQL, System Design, Distributed Systems, Technical Leadership, Mentoring

CERTIFICATIONS

JLPT N2 - Japan Foundation, 2025

Google Cloud Professional Cloud Architect, 2024 (ID: GCP-PCA-118442)

AWS Certified Developer - Associate, 2021

PROJECTS

matatu-times - Open-source GTFS feed builder for Nairobi's minibus network.

Go and PostGIS, used by two city planning teams. github.com/amaranwosu/matatu-times

kanji-drill - Spaced-repetition drill app I built to get through N2 kanji.

TypeScript, React, IndexedDB. amaranwosu.dev/kanji-drill

AVAILABILITY

Available from 1 May 2026 (two months' notice at Sendy).

Open to fully remote roles with Japanese companies; happy to overlap with JST mornings. Open to relocating to Tokyo after about twelve months.

Target countries: Japan, Singapore, Germany.

Salary expectation: USD 68,000 - 85,000.
